DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jonathan R. Bowser on September 1, 2006.

The application has been amended as follows:

In The Claims

Claim 3, in lines 2-3, replace "the last update phase" with --a last update phase--.

Claims 4 and 14, in line 4, replace "the current sequence number" with --a current sequence number--.

Claim 11, in line 5, replace "is adapted to transmit" with --is for transmitting--. In lines 9 and 13, replace "is operable to transmit" with --is for transmitting--. And in line 12, replace "parameter does not fulfill" with --parameter does fulfill--.

Claim 13, in line 3, replace "the last update phase" with --a last update phase--.

Claim 16, in line 2, replace "is operable to obtain" with --is for obtaining--.

Allowable Subject Matter

2. Claims 1-20 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or fairly suggest transmitting an extended update packet containing information about the irregular change if the determined at least one packet stream parameter fulfills a predetermined condition; and transmitting an extended non-update packet containing information about the irregular change if the determined at least one packet stream parameter does not fulfill the predetermined condition, wherein the extended non-update packet is not used to update the context, as specified in independent claims 1 and 11.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Le et al (US Patent No. 6,882,637 B1) discloses method and system for synchronizing the transmission of compressed headers in data packets.

Jonsson et al (US Patent No. 6,970,476 B1) discloses an efficient header compression context update in packet communications.

Eklund (US Patent No. 7,058,728 B1) discloses method and apparatus for initiating compression of headers of packets and refreshing the context related to the packets.

Burmeister et al (US Patent No. 6,967,930 B2) discloses method and apparatus for transmitting data packets over a channel wherein the data packets have compressed headers.

Art Unit: 2616

Svanbro et al (US Patent No. 6,535,925 B1) discloses packet header compression using division remainders.
